

Address to Parliament:
Prohibition of the Sale of Industrial Strength Shocolate
English 12

The subject of prohibiting the sale of Industrial Strength Shocolate in Canada has been oft discussed in higher circles, but today it has come to the attention of Canadian Parliament. It is our suggestion that the sale of this product in Canada be banned immediately, for it causes terrible moral corruption within our great country! Our young people are being perverted at a shocking pace by this appalling blight upon our society. If the sale of this product is allowed to continue we will be thrust into a downward spiral of impending doom. It is to avert great peril that we must urge the prohibition of Industrial Strength Shocolate.

The cystic acne caused by this product has put our young people in dire straights, and has created riotous situations in our schools. Suicidal tendencies now exist in over half the teen population due to social self consciousness caused by the severe deformities of this disease provoked by Industrial Strength Shocolate. The severe mental damage that this product inflicts on our young people is reason enough to ban the sale of this atrocious substance in our beautiful country.

The extreme good spirits caused in some by the consumption of this product have created the largest population explosion in history. People all over Canada are procreating at an astounding rate. Within a decade we will have exceeded the limits of our borders and communities will spill over into the US and Mexico. The rate of population growth has confounded many of our best professors causing their untimely deaths. The laughter of celebrating people has deafened thousands, and several species of dust mites have gone extinct within the last two years due to being consumed in the chocolate.

The methane gas produce by those suffering from uncontrollable bowel movements has caused Canada to exceed its limit on greenhouse gasses by 350 percent. The increase in pollution production has caused Canada's international standing to falter as the UN looks at us with increasing contempt. Other pollutants such as mass burning of oil are necessary, but this can be prevented. The ban of the sale of Industrial Strength Shocolate is imperative and this bill should be passed with all haste as it is the ONLY solution to our terrible problem.

Though to some people the sale of this product maybe a minor problem, we disagree with this mentality. Those who say that we should not waste our time on such a trivial issue but rather, focus more on larger issues like child labour, deteriorating education on world issues, racism, animal testing, and the sale of illegal products to minors are over extending their reach. We must start with the symptoms to cure the disease. Parliament must focus first and foremost on the small, but perilous uprisings within our country. Shocolate must be banned to prevent other uprisings of damaging social habits.
